How to read this checklist

- ☐

Empty box: variant exists, not yet collected. Fill in when you have it.
- Em-dash: this variant does NOT exist for this card (e.g., no reverse holo printing).
- Variant columns per set reflect only the printings that exist for that release era.

Source: [pokemontcg.io API](#) (cached 2026-05-25) plus manual Bulbapedia cross-check.
Variant columns per set reflect the printings that actually exist for that release era. Filled square = collected; em-dash means that variant does not exist for that card.
Chaos Rising and MEP Black Star Promos sourced manually from Bulbapedia; the API had not indexed that set yet at generation time.
Cosmos-holo, deck-exclusive non-holo, and stamped-promo variants cross-referenced against [PokemonTCG_EmptyChecklist_v11.0.xlsm](#). First-pass coverage only - review and add any missing prerelease, build-and-battle, or blister reprints by hand.

ERRATA & NOTABLE ODDITIES

Cards that exist outside normal collecting scope — test prints, "for position only" samples, and other curiosities surfaced by the source workbook. Not tracked with checkboxes above.

☐ Expedition Base Set #34 — Ampharos

'For Position Only' test card. Per the source workbook: 'Test cards meant to be destroyed. Prominently display For Position Only on card image.' Extreme rarity if any survived; functionally a collector curiosity rather than a playable print.
